

Physics 435 final exam results

85 is maximum possible but I can't change max score because grade book is locked

Most of you did very well. Our average was 68.1 out of 85 possible or 80% which was same as on midterm 1 and 2. Congratulations! I would consider a score above 79 to be very good.

Unfortunately I won't be able to assign letter grades until Tuesday noon.

It was a real pleasure teaching this course! Thanks!!
